

Guess the Sound

Level:

Elementary - Intermediate (can be used for virtual language lessons)

Objectives:

the student will practice their vocabulary recollection and spelling

Timing

5-10 mins

Prep/

Materials:

prepare a set of about 15 various household sounds

1) Tell the student you are going to play 15 different sounds, which they should try to identify and write down. These sounds can be easily found online (for example, YouTube is a great resource for locating short sound clips).

2) Play the sounds one at a time and wait for the student to write down the sound before moving onto the next one.

3) If the student does not recognize the sound, do not provide the answer to them, but show a picture of the sound source (pictures should be prepared before the lesson as well). The student might know the word even if they do not recognize the sound.

4) For more advanced students, the student could then tell a story that incorporates a few of the words. They could even write a story or a short dialogue using any number of the household vocabulary words. Even better yet, they could perform their dialogue with a family member!
